THE BATCAVE

SIZE: Enormous
STATUS: Secret
MAIN COLOR: Black
FIRST APPEARANCE: LEGO Batman Set #7783, August 2006

ORIGIN: As a younger, smaller mini-figure, **Bruce Wayne** once fell into the bat-filled caverns beneath **Wayne Manor.** Now **Batman** makes use of those same caves for his secret headquarters.

EQUIPMENT: Constructed from over 1,071 pieces, the gigantic **Batcave** is outfitted with the best equipment the Wayne fortune can buy, all maintained by **Batman's** faithful butler **Alfred.** On the top level, a hi-tech crime lab helps **Batman** hone his detective skills with the aid of a powerful supercomputer and a collection of villainous clues. A special pod lets him quickly change from dashing playboy to caped crime-fighter, and a net-launcher captures unwelcome intruders. In the lower levels are the rotating vehicle repair bay and docking platform, a prison cell assembled to hold even the toughest super-criminals, and much more - all built brick-by-brick by the **Dark Knight** himself!

Currently under development is the **Batblade,** a high-speed pursuit vehicle built for frozen missions. Against its thermal shielding, rocket propulsion and ice-smashing concussion cannons, cold-weather villains like **Mr. Freeze** and **the Penguin** don't stand a chance!

STATUS: For the **Dark Knight,** this is home sweet home!
